

**marcotodo - intelligent heat technology**  
**TeQua<sup>®</sup>-ModulSystem**

- ▶ recorded process quality
- ▶ maximum flexibility at tempering, drying and heating
- ▶ without thermal induced tension

**TeQua®-ModulSystem. All or 1**  
**- We have the documentable temper solution.**

With our TeQua® ModulSystem we offer you a warm air based kiln solution for tempering, drying and heating for the following applications:

The modular design enables us to manufacture kilns for all kind of products:

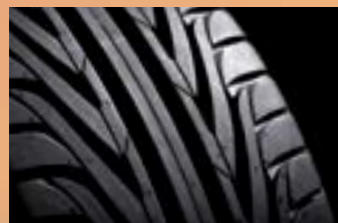

**Fibreglass**

**Carbonfibre**

**Cold-curing plastics**

**Rubber**

**Repair**

Our special light-weight materials are individually adaptable to any surface.

**Large Parts**

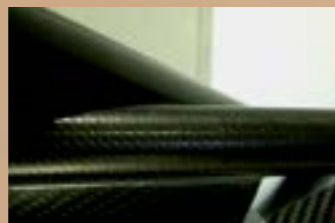

**Small or Micro-Parts**

**Bulk material**

**Individual solutions with TeQua®-Box & TeQua®- Air**

**Selective heating**

With our flexible hot air pipe and hose system we can offer you solutions for selective and laminar hot air treatments.

► **Aviation**

► **Wind industry**

► **Shipping**

► **Automobile industry**

**Powerful technique for almost all industries with the TeQua®-ModulSystem !**

Constantly growing fields of application of composite materials cause new process- and procedure requirements.

For production as well as repair work and maintenance we offer solutions that make your work easier. With our TeQua®-ModulSystem we deliver aviation approved tools and materials which ensure the safety of all processes and fully meet all quality standards. With our TeQua®-ModulSystem we offer recordable solutions, always adapted according to your needs. An increase of your efficiency up to 65% is possible.

Our proven recording and documentation technology will also be individually adjusted and updated regularly.

For the production of composite parts as well as for individual applications like we offer modular solutions. As manufacturer we can offer tailor-made solutions and create an optimal TeQua®-ModulSystem for your needs.

Our own quality standards guarantee you always best quality and safe processes as well as long-term and reliable services.

Even renowned major aviation enterprises trust in our TeQua®-ModulSystem.

**Your advantages by using the TeQua®-ModulSystem**

- significant improvement of product quality
- increase of structural capability
- reduction of cycle times
- easy handling and safe operations

**Tempering with our TeQua®-ModulSystem creates benefits - also for your processes.**

**marcotodo - YOUR partner  
for heat technology solutions**
